IOTNECT

NEO VISION

PRODUCT

About Us

IOTNECT Sdn Bhd is a newly established technology company founded in 2025 and headquartered in Ampang Jaya, Selangor. We specialize in **AI Computer Vision expert and analytical dashboard systems**, helping organizations transform complex data into clear, actionable insights. Although newly formed, our team is driven by a strong vision to support businesses in achieving digital transformation through custom dashboards, system development, and data integration solutions.

IOTNECT

At IOTNECT

We believe AI Computer Vision expert is the new oil, and we are committed to empowering industries with tools that improve decision-making, efficiency, and real-time monitoring. Our goal is to become a trusted technology partner for businesses seeking to innovate and grow in the digital era.

OUR CAPABILITIES

IOTNECT

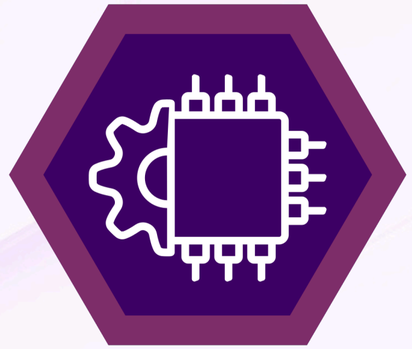
IOTNECT is oneof the leadingICT Company that provides world class Information and Communication Technology (ICT) products and services to companies, individuals, organizations, institutions and many more. We have professionals who are innovative and creative in providing these ICT products and services in Malaysia and abroad.

INTERNET OF THINGS (IOT) PROVIDER

Expertise in data communication as well as IoT retrofitting that convert conventional existing system into convenient remote monitoring

AI EXPERTISE

Our AI Vision expertise focuses on transforming existing CCTV infrastructure into intelligent video monitoring systems. Through advanced AI-powered video analytics, we enable organizations to extract actionable insights from their existing cameras without the need for costly CCTV replacement.



HARDWARE EXPERT

Expert in supply, install, and repairing of various hardware, machine and high level equipment. We are also capable of designing new circuitry.

Neo Vision™

“Your Eagle Eye Partner”

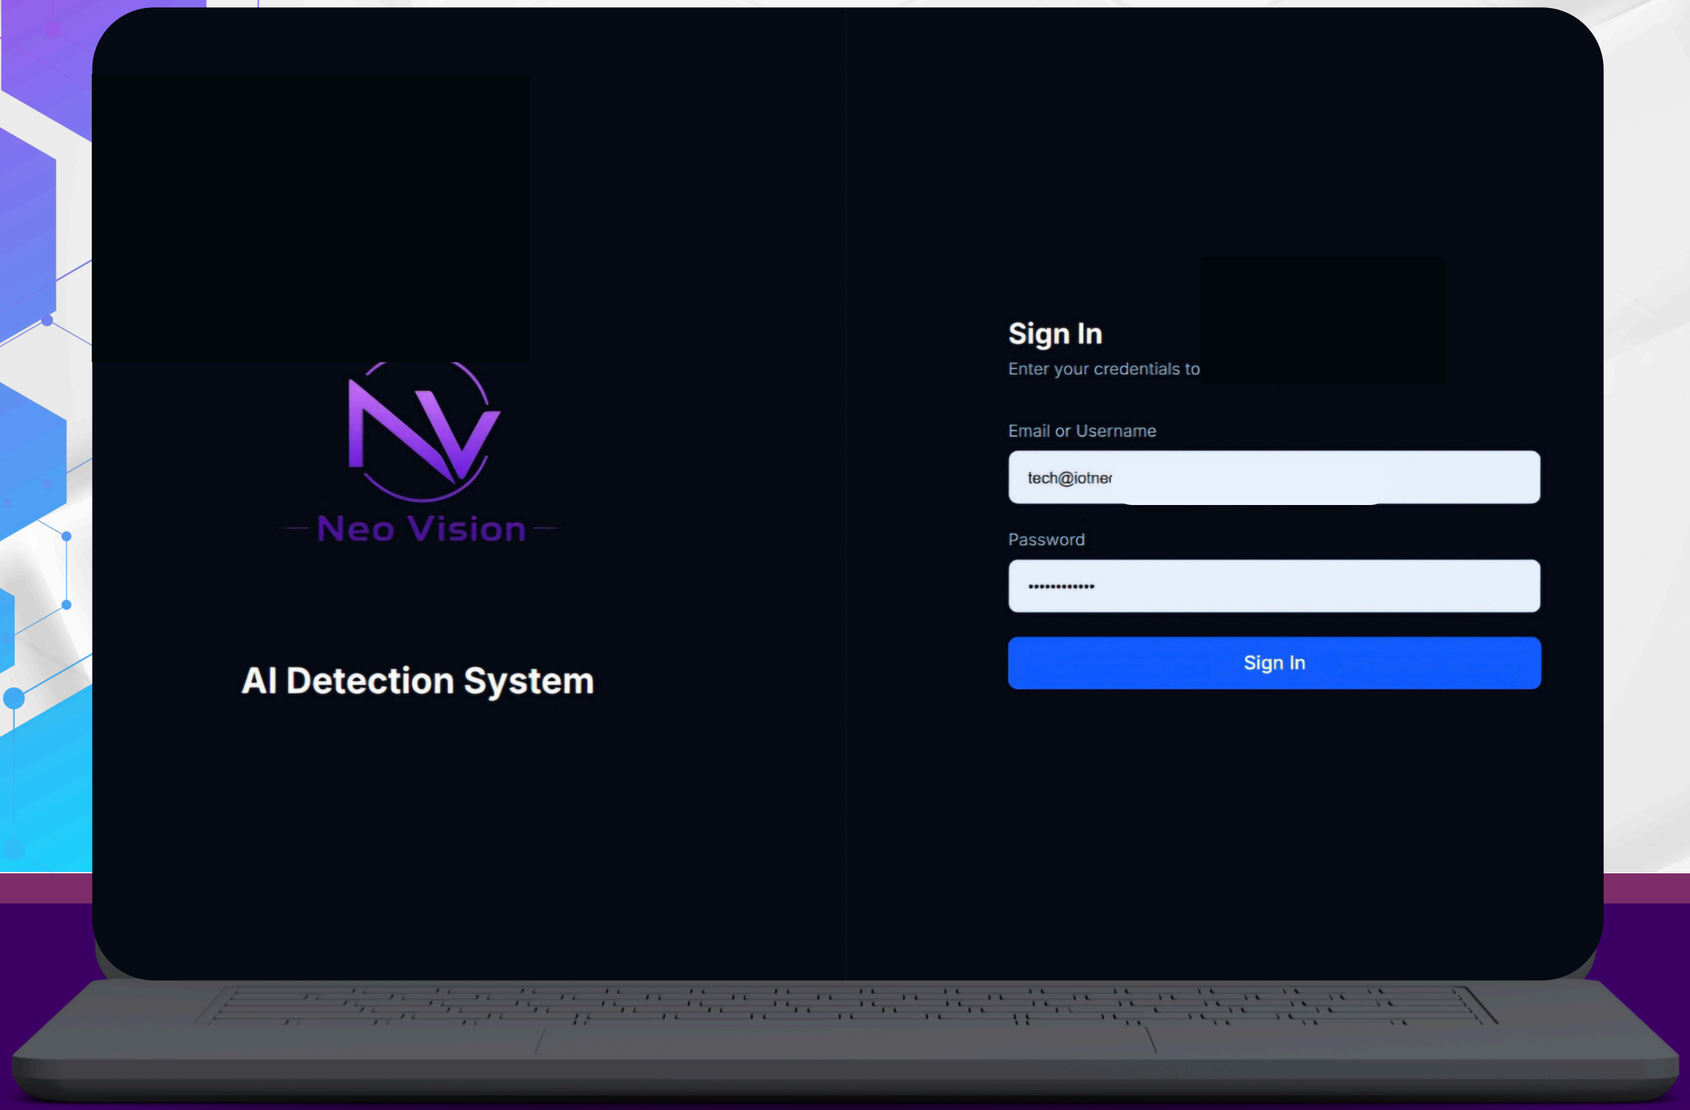
Description:

Neo Vision™ is an AI-powered video analytics platform that transforms conventional CCTV systems into intelligent surveillance solutions without replacing existing cameras. Designed for enterprises, government agencies, smart cities, industrial facilities, and critical infrastructure, Neo Vision delivers real-time event detection, intelligent monitoring, automated alerts, and actionable insights through advanced AI. By maximizing the value of existing surveillance investments, Neo Vision enables organizations to enhance security, improve operational efficiency, and accelerate digital transformation.

Neo Vision

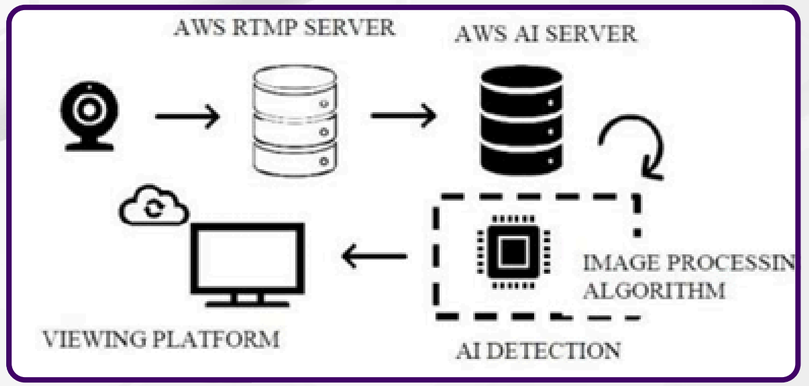
CUSTOMIZE LOGIN PLATFORM

IOTNECT



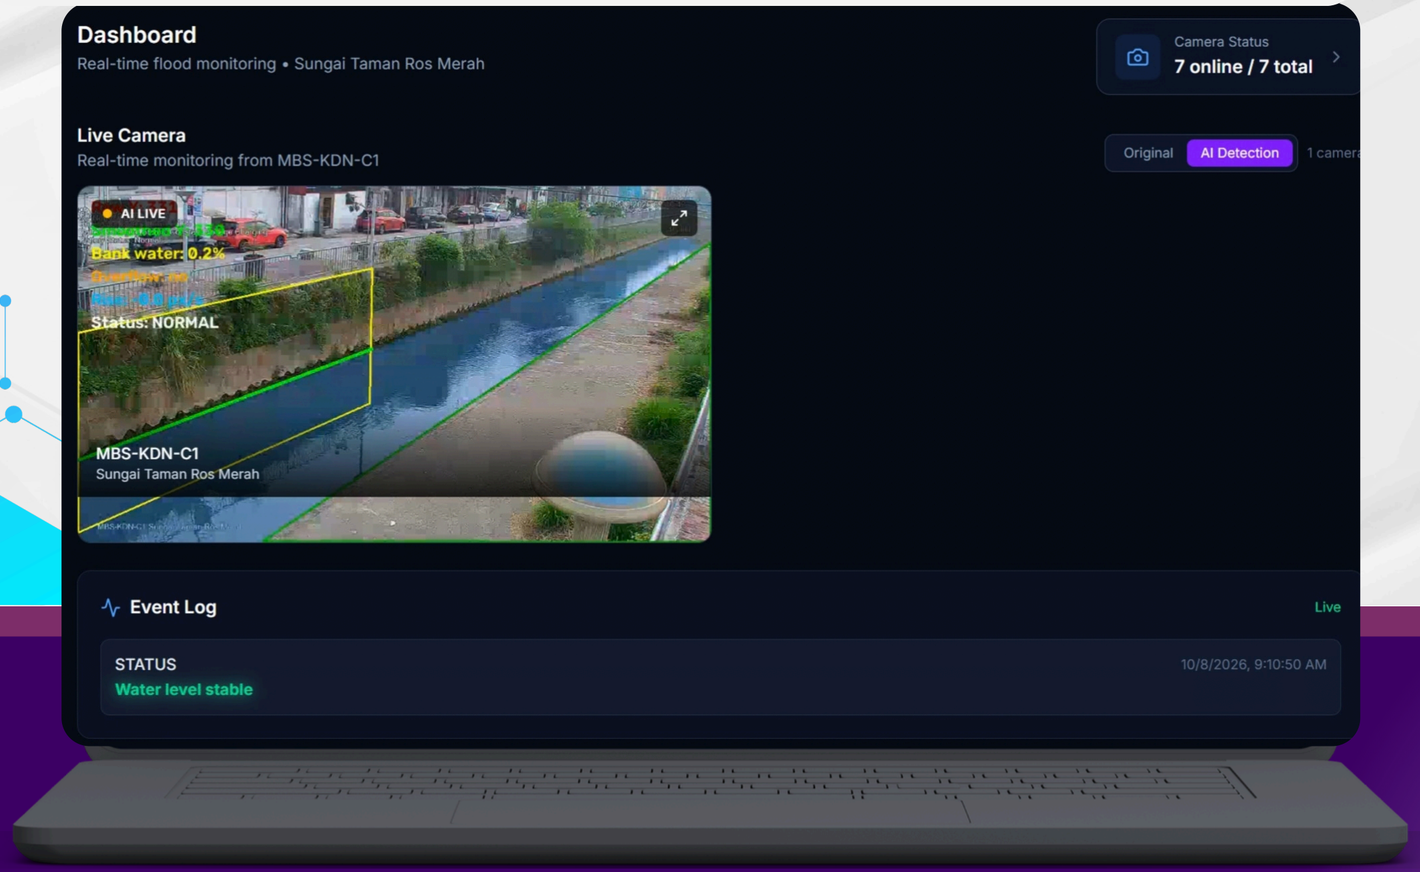
Surveillance Predictions Using Artificial Intelligence

The AI algorithms are designed to analyze different types of data such as Safety, Criminal, and Human Behaviour. By combining and analyzing this data, AI can identify patterns and make predictions about when and where any misconduct in area.



AI flood monitoring

An AI CCTV flood monitoring system uses video cameras and computer vision to watch water levels in real time. It detects rising water, measures flood depth, and sends instant alerts to local authorities. This setup helps cities track risks, warn residents early, and manage emergency responses faster



AI Human Behaviour Analysis

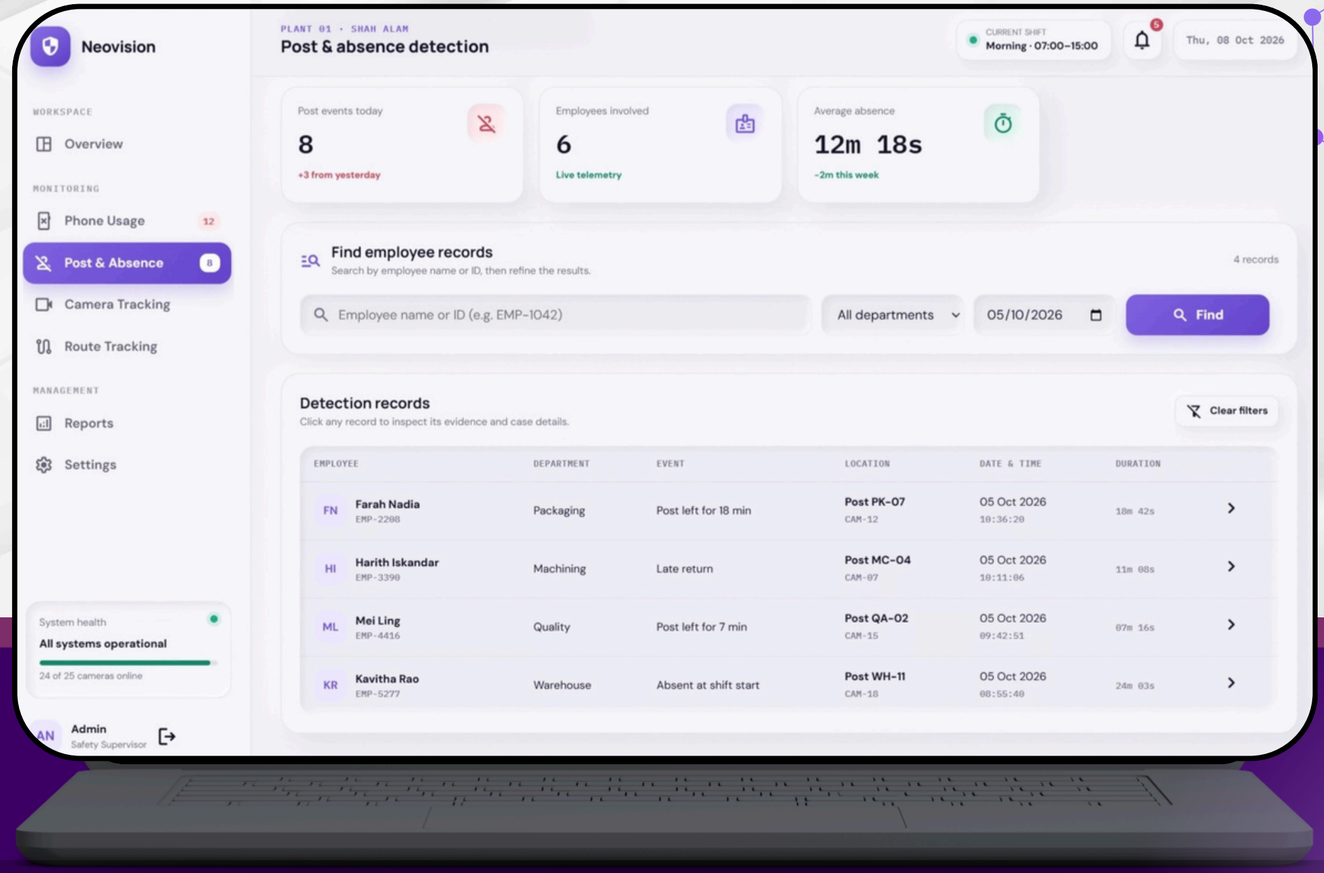
IOTNECT

AI human behaviour analysis using CCTV vision is a technology that uses smart cameras to watch people. It spots actions like falling, fighting, running, or loitering in real time. The system alerts security teams right away to stop problems before they go

Eagle Eye for Smart Factory/Smart Building

IOTNECT

Eagle Eye is an AI-powered video monitoring solution for Smart Factories and Smart Buildings, providing intelligent insights into workforce activities, attendance, safety compliance, and operational events using existing CCTV infrastructure.



AI Product Inspection

AI Product Inspection is an AI-powered quality control solution that uses computer vision to automatically inspect products, detect defects, identify irregularities, and verify product quality in real time. It helps manufacturers improve inspection accuracy, reduce human error, minimise product waste, and enhance production efficiency.
